### STUDENT DATA INFORMATION REQUEST FOR SOFTWARE SERVICES

Colorado's Student Data Transparency and Security Act [*C.R.S. Section 22-16-101 et seq.*] requires Poudre School District (PSD) to set forth certain contractual requirements before agreeing to the use of products that share student data. Due to the specificity of this language, PSD has opted to use its own contract to ensure compliance and alignment with the law and U.S. Department of Education recommendations regarding National Institutes of Standards and Technology Guidelines for Media Sanitization.

The law defines Student Identifiable Data as all items which are collected, maintained, generated, or inferred through use of the service, which includes metadata. This means any data element in the software's data table that can be connected to a student must be transparently identified along with how the data will be used. Because this may be different from what the company has reported under the Family Educational Rights and Privacy Act (FERPA), the District recommends pulling the data table to include all data elements.

Please provide the following information to facilitate the contracting process:

- 1. Detailed, formal description of product and scope of work to be completed.
  - Descriptions should not include wording such as "most used" or "used by X number of schools."
  - Service descriptions should be detailed and free of sales language so it's clear what's being purchased.

HappyNumbers.com is a PreK-5 online math supplement. It helps PreK-5 teachers differentiate instruction and deepen students' conceptual understanding of math. Driven by pedagogy and supported by technology (not vice versa), it's not a set of electronic worksheets or another "all dancing, all singing" resource. Instead, we teach students to "think math": students explore the meaning behind the math, building upon simple concepts to create connections and develop deep understanding.

- 2. What student data is collected through use of the system?
  - List all student data that's collected, maintained, generated, or inferred through use of the service; this includes information created or collected by the company.

The following pages contain an example that will serve as a guide for the company's IT team; these items are known as data tables or data dictionaries.

PSD must have specific information from the company in a separate document, which will become an exhibit to the contract. Links to online privacy policies will not be accepted; these policies must be transparently identified in a static document.

## **Our Educational Approach and ESSA Compliance**

Happy Numbers is built on a foundation of rigorous research and adheres to the evidence standards of the Every Student Succeeds Act (ESSA), specifically within Tier III 'Promising Evidence.' Our 2023 studies highlighted a significant positive association between program usage and increased math scores for young learners. Our teaching methodology is deeply rooted in established educational practices, utilizing a Concrete-Pictorial-Abstract model tailored to individual learning pathways. This approach ensures that students remain in their Zone of Proximal Development, where they receive just the right level of challenge and support.

#### **Key practices include:**

- Scaffolding Learning: Our guidance begins with comprehensive support, gradually fostering
  independent problem-solving. Continuous feedback through interactive models, hints, and animations
  aids student learning. If additional assistance is needed, the problems are broken down into
  manageable steps for collaborative solutions.
- Maintaining Engagement: Our unique scoring system prevents students from advancing without demonstrated understanding. Immediate, color-coded feedback and friendly tips help maintain motivation and interest without overwhelming the student. Interactive math exercises engage students, while visual rewards acknowledge their achievements, enhancing engagement.

For a detailed overview of our research findings and educational practices, please refer to our ESSA Tier III reports: for Kindergarten - Grade 1 and Grades 2-5.
