Does the system allow integration for rostering?

Yes, rostering is available. The data management services for aimsweb®Plus enable districts and schools to import and export certain data to and from their student information system (SIS). Data management services Clever and ClassLink are available with aimswebPlus. What types of data?

Imported data generally includes student information for rostering (such as student name, ID, school, grade, classroom, teacher, etc.)

Exported data can include certain types of student results data from aimswebPlus.

These exports and imports can take the form of automated or manual services depending on what best meets your needs. As you close out one school year and prepare for the next, consider which import and export options would best serve you.
