

## **identiMetrics Accessibility Commitment**

As a commitment to providing an inclusive and equitable experience, identiMetrics is dedicated to ensuring accessibility for all users, including those with disabilities. We strive to make our products, services, and digital content accessible, usable, and enjoyable for everyone.

### **Core Principles**

- Inclusivity

We believe everyone deserves access to our offerings, regardless of their abilities.

- Compliance

We are committed to complying with relevant accessibility standards and regulations, such as the Americans with Disabilities Act (ADA) and Web Content Accessibility Guidelines (WCAG).

- Continuous Improvement:

We are regularly evaluating and improving our accessibility practices to ensure we are meeting the needs of all users.

### **Specific Actions**

- Accessibility Audits

We conduct regular accessibility audits of our website and other digital platforms to identify and address any potential barriers.

- Training

We provide accessibility training to our employees to promote awareness and understanding of accessibility best practices.

- User Feedback

We actively solicit user feedback on accessibility and incorporate it into our improvement efforts.

- Accessible Communication

We strive to make our communication accessible, including offering alternative formats when needed.

- Partnerships

We collaborate with accessibility experts and organizations to ensure we are following best practices and staying up-to-date on relevant advancements.

### **Ongoing Efforts**

- We are continually working to improve the accessibility of our products, services, and digital content.
- We will share our progress and efforts to improve accessibility with our users and stakeholders.
- We will keep our accessibility statement updated to reflect any changes in our accessibility practices and goals.

### **Contact Information**

If you encounter any accessibility barriers on our website or in our services, or if you have any questions or suggestions regarding accessibility, please contact us.

# identiMetrics Accessibility Conformance Report

6/2/2025

**Product:**

identiMetrics Finger Scan ID Management

identiMetrics is the fastest, most accurate and efficient way to identify students unlike outdated ID methods like ID cards, PINs, clickers and tally sheets, which often produce erroneous results. With the touch of a finger, students accurately identify in as little as two seconds.

**Evaluation Methods Used:**

identiMetrics was evaluated using Chrome v. 137.0.7151.56 on a Windows 11 version 24H2 desktop computer. Assistive technologies used in this evaluation include:

- \* NVDA (screen reader)
- \* Windows screen magnification function
- \* Exclusive use of the keyboard to navigate/operate the site content & functionality
- \* Web Accessibility Evaluation Tool (WAVE)

## Success Criteria: Level AA

Criteria	Conformance Level	Notes
<b>1.2.4 Captions (Live) (Level AA)</b> Captions are provided for all live audio content in synchronized media.	Not Applicable	The site does not contain live synchronized media.
<b>1.2.5 Audio Description (Prerecorded) (Level AA)</b> Audio description is provided for all prerecorded video content in synchronized media.	Supports	
<b>1.3.4 Orientation (Level AA 2.1 only)</b> Content does not restrict its view and operation to a single display orientation, such as portrait or landscape, unless a specific display orientation is essential.	Supports	
<b>1.3.5 Identify Input Purpose (Level AA 2.1 only)</b> The purpose of each input field collecting information about the user can be programmatically determined when: <ul style="list-style-type: none"><li>• The input field serves a purpose identified in the Input Purposes for User Interface Components section; and</li><li>• The content is implemented using technologies with support for identifying the expected meaning for form input data.</li></ul>	Not Applicable	The site does not contain input fields that require the user to enter personally identifiable information.
<b>1.4.3 Contrast (Minimum) (Level AA)</b> The visual presentation of text and images of text has a contrast ratio of at least 4.5:1, except for the following: <ul style="list-style-type: none"><li>• Large Text: Large-scale text and images of large-scale text have a contrast ratio of at least 3:1;</li><li>• Incidental: Text or images of text that are part of an inactive user interface component, that are pure decoration, that are not visible to anyone, or that are part of a picture that contains significant other visual content, have no contrast requirement.</li><li>• Logotypes: Text that is part of a logo or brand name has no contrast requirement.</li></ul>	Partially Supports	Accessibility Plan: Developing a dedicated accessibility page on our support website.
<b>1.4.4 Resize text (Level AA)</b> Except for captions and images of text, text can be resized without assistive technology up to 200 percent without loss of content or functionality.	Support	
<b>1.4.5 Images of Text (Level AA)</b> If the technologies being used can achieve the visual presentation, text is used to convey information rather than images of text except for the following: <ul style="list-style-type: none"><li>• Customizable: The image of text can be visually customized to the user's requirements;</li><li>• Essential: A particular presentation of text is essential to the information being conveyed.</li></ul>	Support	

Note: Logotypes (text that is part of a logo or brand name) are considered essential.

**1.4.10 Reflow (Level AA 2.1 only)**

Content can be presented without loss of information or functionality, and without requiring scrolling in two dimensions for:

- Vertical scrolling content at a width equivalent to 320 CSS pixels;
- Horizontal scrolling content at a height equivalent to 256 CSS pixels;

Except for parts of the content which require two-dimensional layout for usage or meaning.

Support

**1.4.11 Non-text Contrast (Level AA 2.1 only)**

The visual presentation of the following have a contrast ratio of at least 3:1 against adjacent color(s):

- User Interface Components: Visual information required to identify user interface components and states, except for inactive components or where the appearance of the component is determined by the user agent and not modified by the author;
- Graphical Objects: Parts of graphics required to understand the content, except when a particular presentation of graphics is essential to the information being conveyed.

Partially Support

Accessibility Plan: Developing a dedicated accessibility page on our support website.

**1.4.12 Text Spacing (Level AA 2.1 only)**

In content implemented using markup languages that support the following text style properties, no loss of content or functionality occurs by setting all of the following and by changing no other style property:

- Line height (line spacing) to at least 1.5 times the font size;
- Spacing following paragraphs to at least 2 times the font size;
- Letter spacing (tracking) to at least 0.12 times the font size;
- Word spacing to at least 0.16 times the font size.

Exception: Human languages and scripts that do not make use of one or more of these text style properties in written text can conform using only the properties that exist for that combination of language and script.

Supports

**1.4.13 Content on Hover or Focus (Level AA 2.1 only)**

Where receiving and then removing pointer hover or keyboard focus triggers additional content to become visible and then hidden, the following are true:

- Dismissible: A mechanism is available to dismiss the additional content without moving pointer hover or keyboard focus, unless the additional content communicates an input error or does not obscure or replace other content;
- Hoverable: If pointer hover can trigger the additional content, then the pointer can be moved over the additional content without the additional content disappearing;
- Persistent: The additional content remains visible until the hover or focus trigger is removed, the user dismisses it, or its information is no longer valid.

Exception: The visual presentation of the additional content is controlled by the user agent and is not modified by the author.

Supports

**2.4.5 Multiple Ways (Level AA)**

More than one way is available to locate a Web page within a set of Web pages except where the Web Page is the result of, or a step in, a process.

Supports

**2.4.6 Headings and Labels (Level AA)**

Headings and labels describe topic or purpose.

Supports

**2.4.7 Focus Visible (Level AA)**

Any keyboard operable user interface has a mode of operation where the

Supports

keyboard focus indicator is visible.

**3.1.2 Language of Parts (Level AA)**

The human language of each passage or phrase in the content can be programmatically determined except for proper names, technical terms, words of indeterminate language, and words or phrases that have become part of the vernacular of the immediately surrounding text.

Supports

**3.2.3 Consistent Navigation (Level AA)**

Navigational mechanisms that are repeated on multiple Web pages within a set of Web pages occur in the same relative order each time they are repeated, unless a change is initiated by the user.

Supports

**3.2.4 Consistent Identification (Level AA)**

Components that have the same functionality within a set of Web pages are identified consistently.

Supports

**3.3.3 Error Suggestion (Level AA)**

If an input error is automatically detected and suggestions for correction are known, then the suggestions are provided to the user, unless it would jeopardize the security or purpose of the content.

Supports

**3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)**

For Web pages that cause legal commitments or financial transactions for the user to occur, that modify or delete user-controllable data in data storage systems, or that submit user test responses, at least one of the following is true:

- Reversible: Submissions are reversible.
- Checked: Data entered by the user is checked for input errors and the user is provided an opportunity to correct them.
- Confirmed: A mechanism is available for reviewing, confirming, and correcting information before finalizing the submission.

Not Applicable

The site does not provide any status messages.

**4.1.3 Status Messages (Level AA 2.1 only)**

In content implemented using markup languages, status messages can be programmatically determined through role or properties such that they can be presented to the user by assistive technologies without receiving focus.

Not Applicable

The site does not provide any status messages.
